

LUNASTONETM

would like to congratulate you on the purchase of the BLUE DRIVE 1

Blue Drive 1 is like 'The Beauty and the Beast'. It has a beautiful body, but can also rear its ugly head. Put all knobs at the 12 o'clock position, and Blue Drive 1 can act as a wet, beautiful and 'sustain-y' clean boost approximately at unity volume. Dial the Drive knob to catch the point just before the drive kicks in and the magic starts to happen. When playing softly, you will still have the beautiful wet transparency, but hit it harder and the Beast will stick out that ugly head. And if you have a 'bite-y' day, just turn the Drive knob all the way up and your audience will definitely feel the sharp teeth of this pedal. The inspiration for the Blue Drive 1 design comes mainly from the vibe of the Blues genre. The Blues scale in itself is a super harmonious pentatonic scale with an extra very active flat 5 note, that always adds edge and spice no matter how many times it is played and listened to. And that basically nails the soul and identity of Blue Drive 1!
