

# LUNASTONE<sup>TM</sup>

would like to congratulate you on the purchase of the DISTORTION 1

Distortion 1 is a classic Hard Rock bastard! It merges a burning-hot amp stack with a classic distortion and squeezes them in to a small chassis. So, you don't need a cranked up Marshall stack anymore to sound like the hard rock guitar heroes! The Tone control on Distortion 1 has an extra wide range in order to give you the opportunity to dial it in to fit your every need. From very closed-sounding effects, useful for heavy riffs, to bite-y and full-on high mids with 'cut through' voicing to push your lead tone through the mix.
